Subject: Microsoft Settlement

My name is Pete Vieites and I am an avid consumer of somputer software from various companies. I agree with the settlement actions and feel it's in the publics best interest. It's time for all companies involved to move on and concentrate their efforts on building better products that we demand. For the record, Microsoft's products, have never harmed the consumer. However, this ongoing bickering between Microsoft, the states (as well as the competitors companies they represent) and the Justice department are doing more harm than good.
